THE UNIVERSITY OF ALBERTA STAFF BULLETIN

EDMONTON 7, ALBERTA

JUNE 18, 1970

CAR PARK II BEGUN

The contract has been let and the construction begun for Car Park II, just north of the Engineering Centre, between 115 and 116 Streets.

The contract was awarded to Harsim Construction Limited for the amount of \$1,180,249.80. Work was started last week and is scheduled for completion in six months.

Plans for the Car Park, as approved by the Board of Governors in March, call for four sloped levels providing 872 parking stalls with plug in. The roof of the car park will hold four tennis courts, landscaping, walkways, and benches.

Prime consultant for the project is J. A. VANDERGIESSEN of the architectural firm of Read, Jones, Christoffersen Limited.

REPRIEVE FOR OLD RESIDENCES

The old residence halls have a new lease on life.

Last December it was announced that Athabasca, Assiniboia, and Pembina Halls would be demolished to make way for a new graduate student housing project, the old buildings having been considered too costly to renovate.

Now, however, W. D. NEAL, Vice-President (Planning and Development), says that "the whole matter has been deferred because finances are not available. The motion to demolish is up for reconsideration with the Board. Renovation will be reconsidered when funds are available."

Next year, Athabasca Hall will not be used as a male graduate student residence because it is considered unsafe. The ground floor will be used instead for academic offices. Assiniboia Hall will continue to house the English Department, and Pembina Hall will continue as a residence for graduate women.

Athabasca, the University's first permanent home, was to have been torn down by the end of the 1969-70 academic year; Assiniboia was to be demolished in 1972, and Pembina was to follow shortly thereafter.

Dr. Neal said that the possibility of alterations is still being explored.

GRADUATE STUDENTS' ASSOCIATION MEETING

Minutes of the Graduate Students' Association meetings are provided by SHEILA NOLAN, Secretary to the Association.

The second Chemistry Building, to be started late this year, will parallel the existing building on the east side. The two structures will be linked at each of their five storeys by a skylighted concourse which will be part of the enclosed pedestrian walkway system as shown in the Diamond-Myers Long Range Development Plan. The building will cost an estimated \$4,000,000 and will require about eighteen months to complete. Plans for Chemistry 2 were given preliminary approval by the Board Building Committee last week. Prime Consultant for the project is A. STEINBRECHER of Eugene Olekshy and Partners.

At its regular council meeting on June 9, 1970, the Graduate Students' Association voted to support the Michener Park Playground Committee to the extent of \$275 for the purchase of permanent playground equipment. \$100 was also granted to the Nursery School and Kindergarten at Michener Park, to assist them in their musical program. Council voted up to \$75 to the interdepartmental softball league which now consists of 12 teams, for the purchase of bats and balls.

ORMAN GRANGER, DON BYERS, JOHN BREWER, and RICHARD WATSON, representatives to the National Graduate Students' Conference held in London, Ontario, May 12 to 15, reported on the outcome of the meetings. Recommendations from the various sessions included: increased development of inter-disciplinary programs; increased Canadian course content; preference for Canadians in hiring for universities, by means of a quota system and/or a "Canada First" policy; an end to the current government freeze on Medical Research Council, National Research Council, and Canada Council grants; a study to assess the trends of the over-production and employment problem; that all forms of student remuneration be considered taxable as outlined in the White Paper on Taxation (Section

2.24). During the session on the relationship of the graduate student to the university and society, recommendations on teacher training for graduate students entering teaching, and parity for students on all university committees were put forward. As an end result of the conference, the formation of a national organization for graduate students was initiated. The "Canadian Congress of Graduate Students" will have as its primary goal the gathering and distribution of information. A steering committee consisting of 4 regional representatives and 2 "at large" members was set up. Richard Watson is the representative from Western Canada.

Canada voted unanimously to support the retention of supplemental examinations, in view of a motion for their abolition recently tabled in General Faculties Council. Members felt in general that the reasons in favor of abolition were not sufficient to justify the hardship which would be incurred by that percentage of students who write and pass supplementals.

Two graduate students, ZOLTAN MELKVI (Physics) and WERNER SCHMIDT (Educational Administration) were nominated by Council to sit on the General Faculties Council Selection Committee for a new Dean of Graduate Studies.

It was announced that, commencing in July, graduate students night at the Faculty Club will be held on Thursday nights instead of Tuesdays.

Notice of motion to amend the Graduate Students' Association constitution with regard to representation to Graduate Students' Association Council has been received, and will be given first reading at a special meeting called for June 15, 1970. Remaining items on the agenda will also be discussed at this time.
